State Normal School at Fitchburg.

HISTORICAL SKETCH.

THE Fitchburg Normal School opened in July, 1895. Since then it has graduated twelve classes, four hundred and three students from the elementary course, one hundred and thirty-four from the advanced course and twelve from the kindergarten course. It has given certificates to one hundred and one completing one-year courses. Its graduates are teaching in Japan, Porto Rico, Hawaii, California, New Mexico, Idaho, Indiana, Michigan, Illinois, Maryland, New Jersey and seven other states, but the great majority of them are at work in Massachusetts.

LOCATION.

Fitchburg had in 1905 a population of 33,026. It is situated at the junction of the Boston & Maine and the New York, New Haven & Hartford railroads, in one of the most beautiful and most healthful sections of the State. Its public library is of the best, ranking in its music department third in the United States. In connection with it there is a fine art museum, which is also open to students.

BUILDINGS AND GROUNDS.

The work of the normal school, except a part of the advanced practice, is carried on in six buildings in Fitchburg. Normal Hall, the main building, Miller Hall, the boarding hall, the Edgerly School, an elementary practice school, and the new Manual Arts Building are together upon the same lot, a piece of land containing about five and one-half acres. These buildings,

erected and furnished, represent an outlay of about \$400,000. Much care is taken to make the grounds as beautiful as possible, and to afford to students every advantage and opportunity for outdoor sports.

Normal Hall is situated about half a mile from the railroad station, and is reached by two lines of street cars. The situation, while very easy of access, gives a beautiful prospect in every direction, the city lying upon one hand and the open country upon the other. The building is equipped in the best possible manner, and is ornamented with many reproductions of works of art, gifts of the various classes and of the alumni. A special catalogue of these is in print, and may be had upon application.

Miller Hall, the dormitory and boarding hall, is most modern in its construction and its conveniences. Rooms are arranged in suites for two or three, each suite consisting of a common sitting room and bath and a separate sleeping room for each occupant. The building is heated by steam and lighted by electricity. Every care has been taken to make it as homelike as possible, — the suites being different in color schemes, papering, and furnishings. The building and the domestic arrangements are in care of a housekeeper, and the students in charge of a matron, a member of the normal school faculty. A night watchman guards against fire or accident. The building is connected by telephone, so that parents may communicate with students immediately when necessary. It is recommended that, whenever possible, students board in Miller Hall, instead of travelling to and fro on the trains daily. The helpfulness of dormitory life in refining and developing the character of young women who have lived little or not at all away from home is usually underestimated.

MODEL AND PRACTICE SCHOOLS.

These are in Normal Hall, the Edgerly School, Highland Avenue School and Day Street School in Fitchburg, and in scattered rooms in Fitchburg and in Leominster. They include

all grades. Each pupil before graduating from the elementary course must teach in charge of one of these rooms for about fourteen weeks. For this first teaching no salary is paid. Students in the advanced course, or four years' course, teach the entire third year under the supervision of the normal school faculty, at a salary of from eight to ten dollars per week. A similar opportunity for teaching is also offered to a limited number from the teachers' course.

Over one thousand pupils have been in attendance in the model and practice schools during the past year: —

Schools for elementary practice, . . .	528
Schools for advanced practice, . . .	525

NEW MANUAL ARTS BUILDING.

The Legislature of Massachusetts appropriated in 1908 and 1909 \$92,500 for the erection and equipment of a manual arts building upon the normal school grounds. This school will be opened in September, 1909. To it may come all children in the city of Fitchburg, in grades seven and eight, who do not intend to enter the high school. To these children will be given a more practical course than is now given in the two years preceding the high school. More time will be devoted to all kinds of hand work and to the study of Massachusetts industries. This will give the normal students increased opportunity for study and practice in the manual arts and in that industrial education that is so rapidly becoming a large and essential part of the instruction in grammar grades, — the sort of preparation that superintendents are demanding more and more of teachers to-day. There will also be opportunity for any wishing to take up special work in domestic science and in the manual arts, such as wood-working, basketry, tooled leather, working in metal, rug making, embroidery, stencilling, sewing, etc.

COURSES OF STUDY.

The school offers five courses, — a general two years' or elementary course, an advanced course of four years, a kindergarten course, a special course of one year for experienced teachers, and a special course of one year for college graduates.

The Elementary Course.

This course is designed primarily for those who aim to teach in public schools below the high school grade, and who, after graduation from the high school, are unable to give more than two years to their preparation. It comprises substantially the following subjects: —

1. Psychology, history of education, principles of education, methods of instruction and discipline, school organization, and the school laws of Massachusetts.

2. Methods of teaching the following subjects: —

(a) *English*, — reading, language, rhetoric, composition, literature and history.

(b) *Mathematics*, — arithmetic, bookkeeping, elementary algebra and geometry.

(c) *Science*, — elementary physics and chemistry, geography, physiology and hygiene, and the study of minerals, plants and animals.

(d) Drawing, vocal music, physical culture and manual training.

3. Observation and practice in the training school, and observation in other public schools.

The amount of work in this course is so great that only those who enter upon it most thoroughly prepared can hope to complete it, with the required practice, in the time assigned to it.

The Advanced Course.

By arrangement with the city of Fitchburg and the town of Leominster, a limited number of the most promising graduates from the elementary course of the Fitchburg Normal School are

given the opportunity to teach for a year on salary, under the supervision of the normal school teachers, — this teaching to be followed by a year of study at the Fitchburg Normal School.

Kindergarten Course.

This course requires at least two years for its completion. Ordinarily students will be required to complete the two years' course before taking up the year of practical work with the children, and the theory and history of the kindergarten.

Candidates for admission to this course should not only be able to meet the requirements for admission to the general two years' course; but should also be able to sing and to play the piano.

Special One Year's Course for Teachers.

Teachers of considerable experience, who bring satisfactory testimonials in regard to such experience and in regard to character, may select from the two years' course of study a course approved by the principal, which may be completed in one year. When such a course is successfully completed, a certificate for the same is given.

Candidates for this course are not required to take the regular entrance examination.

Special One Year's Course for College Graduates.

Graduates of colleges and universities, who give evidence of maturity, good scholarship, and of aptness to teach, may select from the two years' course of study a course approved by the principal, which may be completed in one year. When such a course is successfully completed, a certificate for the same is given. Opportunity for practice work has been arranged for at the Fitchburg and Leominster high schools.

Candidates are admitted to this course without examination. Since the opening of the school, graduates of Dartmouth, Smith, Wellesley, Amherst and Boston University have taken the course wholly or in part.

The demand for college graduates with normal training is much greater than the supply.

CLASSES FOR TEACHERS IN SERVICE.

Teachers may enter the school at any time during the year for a period of any length. Teachers in rural schools who have long vacations in the winter or spring will find opportunities at this school for work in any or all subjects taught in the public schools below the high school. Room and board may be secured upon application.

LIBRARY AND READING ROOM.

Each student has access to the general library, of about 6,000 volumes, and to a large number of public reports and sample text-books. The leading educational periodicals and monthly magazines of the day are also kept on file. A series of lessons in library instruction and the use of books is given by the librarian.

CONCERTS, RECITALS AND LECTURES.

As far as possible the pupils are made acquainted not only with the ideas, but as well with the personalities, of leading educators. In this connection lectures upon important educational topics are frequently given by those who have made a special study of such.

These lectures are not for the benefit of the students alone, but are open to the teachers of the community and to all others interested.

The State Board of Education in its annual report for 1904 says: —

These courses have grown in interest and effectiveness from year to year. Perhaps nothing has ever been done in the school with an equal expenditure of money from which we have received so large and profitable returns.

Through the hearty co-operation of the citizens of Fitchburg, Leominster, Gardner and other towns the amount appropriated by the State for lectures and music has been so

supplemented that the students have been able to enjoy unusual opportunities in this field. The following lectures and concerts (most of which have been held at the Fitchburg Normal School) have been open to all students at the school: —

Three concerts — Kneisel Quartette.

Drawing — Lecture by Frederic L. Burnham, State Agent for the Promotion of Industrial Drawing.

The Canal Zone — Lecture by Helen Varick Boswell, New York.

Legislation — Lecture by Hon. M. Frederic O'Connell, Fitchburg.
St. Paul — Choral Union.

Memorial Day Address — Hon. Alfred S. Roe, Worcester.

Whittier Centennial Address — Prof. W. A. Neilson, Cambridge.

The Individual in the School — Supt. Frank E. Spaulding, Newton.

Moliere — Lecture by Kate Thecla Conley, Boston.

The Peace Movement — Lecture by Lucia Ames Mead, Boston.

The World's Work — Lecture by Hon. George H. Martin, Boston.

Agricultural and Industrial Education — Lecture by Prof. Floyd B. Jenks, Amherst.

Teachers' Ideals — Lecture by Dr. John M. Thomas, president of Middlebury College.

Concert — Corinthian Male Quartette.

Goethe's Faust — eight lectures by Edward Howard Griggs.

Six interpretative recitals: —

King Lear — Henry Lawrence Southwick.

David Copperfield — Walter Bradley Tripp.

As You Like It — Maud Gatchell Hicks.

Hamlet — Henry Lawrence Southwick.

Twelfth Night — Walter Bradley Tripp.

Madam Butterfly — Jane E. Mitchell

Concert — Whitney Brothers' Quartette.

Concert — The Dunbar Company.

Lecture — Capt. Richard Pearson Hobson

Concert — Schuecker Trio, from Boston Symphony Orchestra, Miss Westgate, soloist.

Concert ¹ — Chamber Music for wind instruments, by the Longy Club, Boston.

Graduation Address — Robert Luce.

¹ This concert was added to the course by the kindness of Mr. Herbert I. Wallace, Fitchburg.

GIFTS.

The following gifts have been received by the school during the past year : —

Several pamphlets and books — Fitchburg Public Library.

Ptarmigan — Mrs H. F. Bullard, Fitchburg.

One hundred copies of "A Study of Habit" — Thirteenth elementary class.

Twenty copies of "Studies in Development and Learning" — Ninth advanced class.

The thirteenth class in psychology and child study decided from all their papers on "Habit" to prepare one and to publish it in pamphlet form. This was done under the direction of the head of the department. Another publication this year by this department is that of the theses of the ninth advanced class, graduated in June, 1907. These theses are issued as a monograph, entitled "Studies in Development and Learning," No. 12 of the Archives of Psychology, edited by Prof. R. S. Woodworth of Columbia University.

Mr. Herbert I. Wallace, who for many years has fostered the love of music in Fitchburg, and whose gift of the Jenks Musical Library has put the musical department of the Wallace Public Library in Fitchburg in the front rank among the libraries in the United States, brought the Longy Club to the school last March for a concert for wind instruments, to which the faculty and students of the school and those who had co-operated in building up the lecture fund were invited. We are glad to make this record of our appreciation of the kindly and helpful spirit which prompted this action.

Acknowledgments are also due for many gifts to the school, for the kindly co-operation of the officers of the Choral Union, and of the managers of the Leominster high school lecture course and for the interest and assistance of all who have helped to make possible and successful the lecture courses at the normal school.

The Fitchburg Public Library has also heartily assisted in the work of the school, issuing special bulletins in regard to the

various lecture subjects, and helping in many ways the work of the different departments. All students at the school are allowed the same privileges in taking out books from the library as citizens of Fitchburg, and the work with the children in the schools of observation and practice has been much aided through the co-operation of the librarians.

REQUIREMENTS FOR ADMISSION.

Candidates for admission must have attained the age of seventeen years complete, if young men, and sixteen years, if young women. Their fitness for admission will be determined : —

1. By their standing in a physical examination.
2. By their moral character.
3. By their high school record.
4. By a written examination.
5. By an oral examination.
6. By certification from high schools.

Physical Examination.

The State Board of Education adopted the following vote March 7, 1901 : —

That the visitors of the several normal schools be authorized and directed to provide for a physical examination of candidates for admission to the normal schools, in order to determine whether they are free from any disease or infirmity which would render them unfit for the office of teacher, and also to examine any student at any time in the course, to determine whether his physical condition is such as to warrant his continuance in school.

Moral Character.

Candidates must present certificates of good moral character. In deciding whether they shall prepare themselves to become teachers, candidates should note that the vocation requires more than mere freedom from disqualifying defects; it demands virtues of a positive sort, that shall make their impress for good upon those who are taught.

High School Record.

It may be said, in general, that, if the ordinary work of a good statutory high school, as defined by section 2, chapter 42 of the Revised Laws, is well done, students should be able to meet the requirements of these examinations. *They cannot be too earnestly urged, however, to avail themselves of the best high school facilities attainable in a four years' course, even though they should pursue studies to an extent not insisted on, or take studies not prescribed in the admission requirements.*

The importance of a good record in the high school cannot be overestimated. The stronger the evidence of character, scholarship and promise, of whatever kind, candidates bring, especially from schools of high reputation and from teachers of good judgment and fearless expression, the greater confidence they may have of guarding themselves against the contingencies of an examination and of satisfying the examiners as to their fitness.

Written Examination.

The examinations will embrace papers on the following groups, a single paper with a maximum time allowance of two hours to cover each of groups 1, 2 and 4, and a single paper with a maximum time allowance of one hour to cover each of groups 3 and 5 (*five papers with a maximum time allowance of eight hours*): —

1. *Languages.* — (a) English, with its grammar and literature, and (b) either Latin or French.

2. *Mathematics.* — (a) The elements of algebra, and (b) the elements of plane geometry.

3. *United States History.* — The history and civil government of Massachusetts and the United States, with related geography, and so much of English history as is directly contributory to a knowledge of United States history.

4. *Science.* — (a) Physiology and hygiene, and (b and c) any two of the following: physics, chemistry, physical geography and botany, provided one of the two selected is either physics or chemistry.

5. *Drawing and Music.* — (a) Elementary, mechanical and free-hand drawing, with any one of the topics, — form, color and arrangement; and (b) music.

Oral Examinations.

Each candidate will be required to read aloud in the presence of the examiners. He will be questioned orally, either upon some of the foregoing subjects or upon matters within his experience, in order that the examiners may gain some impression about his personal characteristics and his use of language, as well as give him an opportunity to furnish any evidences of qualification that might not otherwise become known to them.

Admission by Certificate from High Schools.

The State Board of Education passed the following votes on May 2, 1907, in regard to —

ADMISSION ON CERTIFICATE.

Candidates from high schools which are on the certificate list of the New England College Entrance Examination Board may be admitted to any of the State normal schools without examination in any subject required for admission in which they have attained a standing of B, or 80 per cent., as certified by the principal of the school.

Beginning with 1908, candidates from high schools not in the college certificate list may be admitted on similar conditions, if the high schools are approved for the purpose by the Board of Education.

High schools desiring this approval should correspond with the secretary of the Board.

General Requirement in English for All Examinations.

No candidate will be accepted whose written work in English is notably deficient in clear and accurate expression, spelling, punctuation, idiom or division of paragraphs, or whose spoken English exhibits faults so serious as to make it inexpedient for the normal school to attempt their correction. The candidate's English, therefore, in all oral and written examinations will be subject to the requirements implied in the foregoing statement, and marked accordingly.

SPECIAL DIRECTIONS FOR THE WRITTEN EXAMINATIONS.

1. Language.

(a) *English.* — The subjects for the examination will be the same as those generally agreed upon by the colleges and high technical schools of New England.

The list of books for study prescribed by the Commission of Colleges in New England for 1909 is as follows: —

Shakespeare's *Macbeth*; Milton's *L'Allegro*; Burke's *Speech on Conciliation with America*, or Washington's *Farewell Address* and Webster's *First Bunker Hill Oration*; Macaulay's *Life of Johnson*, or Carlyle's *Essay on Burns*.

The purpose of the examination is to discover, (1) whether the student has acquired a good habit of study, (2) whether he has formed any standards of literary judgment, (3) whether he has become discerning of literary merit, and (4) what acquaintance he has with standard English and American writers.

The examination will take such a form that students who have followed other than the prescribed lines of reading may be able to satisfy the examiners on the above points.

(b) *Either Latin or French.* — The translation at sight of simple prose, with questions on the usual forms and ordinary constructions, and the writing of simple prose based in full or in part on the passage selected.

2. Mathematics.

(a) The elements of algebra through affected quadratic equations.

(b) The elements of plane geometry.

While there is no formal examination in arithmetic, the importance of a practical working acquaintance with its principles and processes cannot be too strongly emphasized. The candidate's proficiency in this subject will be incidentally tested in its applications to other subjects.

3. United States History.

Any school text-book on United States history will enable candidates to meet this requirement, provided they study enough of geography to illumine the history, and make themselves familiar with the grander features of government in Massachusetts and the United States. Collateral reading in United States history is strongly advised, also in English history, so far as this history bears conspicuously on that of the United States.

4. Science.

(a) *Physiology and Hygiene.* — The chief elementary facts of anatomy, the general functions of the various organs, the more obvious rules of health, and the more striking effects of alcoholic drinks, narcotics and stimulants upon those addicted to their use.

(b and c) *Any Two of the Following Sciences, — Physics, Chemistry, Botany, Physical Geography, provided One of the Two is either Physics or Chemistry.* — The chief elementary facts of the subjects selected, so far as they may be presented in the courses usually devoted to them in good high schools. It will be a distinct advantage to the candidate if his preparation includes a certain amount of individual laboratory work.

A laboratory note-book, with the teacher's endorsement that it is a true record of the candidate's work, will be accepted as partial evidence of attainments in the science with which it deals. The original record should be so well kept as to make copying unnecessary.

5. Drawing and Music.

(a) *Drawing.* — Mechanical and free-hand drawing, — enough to enable the candidates to draw a simple object, like a box or a pyramid or a cylinder, with plan and elevation to scale, and to make a free-hand sketch of the same in perspective. Also any one of the three topics, — form, color and arrangement.

(b) *Music.* — The elementary principles of musical notation, such as an instructor should know in teaching singing in the

schools, including major and minor keys, simple two, three, four and six part measures, the fractional divisions of the pulse or beat, the chromatic scale, the right use of the foregoing elements in practice, and the translation into musical notation of simple melodies or of time phrases sung or played.

Importance of Adequate Preparation.

Candidates should measure their duty of making adequate preparation not wholly by the subjects selected and the papers set for the admission examinations, but by the larger demands their chosen vocation is sure to make upon them. The more generous and thorough, therefore, the preparation of the candidate, the greater the likelihood of profiting by the normal school, of completing the elementary course on time, of securing employment after graduation, and of doing creditable work as a teacher.

The candidate is advised, therefore, to utilize all feasible opportunities offered by the regular high school course for promoting this breadth of preparation, and the high school should aim to hold the candidate up to the higher ideals of such preparation.

Equivalents.

A reasonable allowance for equivalents will be made in case a candidate, for satisfactory reasons, has not taken a study named for examination. Successful experience in teaching is taken into account in the determination of equivalents.

PRELIMINARY EXAMINATION.

1. Candidates may be admitted to a preliminary examination a year in advance of their final examination, provided they offer themselves in one or more of the following groups, each group to be presented in full: —

1. French.
2. Mathematics.
3. History and geography.
4. Science.
5. Drawing and music.

Preliminary examinations may be taken in June only.

Every candidate for a preliminary examination must present a certificate of preparation in the group or groups chosen, or in the subjects thereof, the form of certificate to be substantially as follows:—

_____ has been a pupil in the
_____ School for _____ years, and is
in my judgment, prepared to pass the normal school preliminary examination in the following group or groups of subjects and the divisions thereof:—

Signature of principal or teacher, _____

Address, _____

2. The group known as *1. Languages* (except French) must be reserved for the final examinations. It will doubtless be found generally advisable in practice that the group known as *4. Science* should also be reserved.

DIVISION OF THE EXAMINATIONS.

Candidates for the final or complete examinations are earnestly advised to present themselves, so far as practicable, in June. Division of the final or complete examinations between June and September is permissible; but it is important, both for the normal school and for the candidate, that the work laid out for the September examinations, which so closely precede the opening of the school, shall be kept down to a minimum.

Preliminary examinations may be taken in June only.

TIMES OF EXAMINATION.

The first examination in 1909 will be held at 9 A.M., on Thursday and Friday, June 24 and 25, at the normal school.

The second examination in 1909 will be held at 9 A.M., on Tuesday and Wednesday, September 7 and 8, at the normal school.

Candidates are advised to present themselves, if possible, at the first examination.

TIMES OF ADMISSION.

New classes will be admitted only at the beginning of the fall term, and, as the studies of the course are arranged progressively from that time, it is important that students should present themselves then for duty. In individual cases and for strong reasons, exceptions to this requirement are permissible, but only after due examination, and upon the understanding that the admission shall be at a time convenient to the school, and to such classes only as the candidate is qualified to join.

DIPLOMAS AND CERTIFICATES.

It is impossible, in the limited time spent in the practice school, to give pupils special and continued training in more than one grade. Although the work in the normal school proper and the observation in the model schools bear upon all grades, yet, in general, graduates of the school are better fitted to take up for their first teaching after graduation the work of the grade, or of about the grade, in which they have been specially trained. Upon request, the principal will gladly give a careful estimate of the kind of work in which, and the conditions under which the graduate is likely to achieve the greatest success.

ALUMNI LOAN FUND.

In June, 1906, was founded an alumni loan fund. This is to be increased yearly by contributions from the alumni. Subscriptions from others will also be gladly received. To students needing help, amounts not exceeding one hundred dollars annually will be loaned, such amounts to be repaid with interest after graduation.

BOARD AND ROOMS.

Rooms are reserved at Miller Hall in order of application upon deposit of four dollars with the clerk of the school. No room will be reserved until this deposit is made. The four dollars will be credited for the first week's board in the fall, but will not be refunded in case a student decides not to enter. No room will be held for a student after the opening of the school in the fall unless special arrangements are made and payment made for the rent of the room.

Board is payable monthly in advance. No reduction is made to students going home regularly over Saturday and Sunday, for the Thanksgiving recess or for less than a full week's absence. In case of sickness or absence for one week or longer money credited to the student will be refunded, at the rate of two dollars and fifty cents per week. In the case of withdrawal from the school, a week's notice must be given, at the expiration of which time all money standing to the student's credit will be refunded. The four dollars per week will include laundry to the amount of fifty cents. An assessment of one dollar to be paid with the first month's board, will be levied on each student to cover the cost of extra help that may be needed because of sickness, and of minor medicines which will be kept on hand for the use of all. This amount, however, will not include doctors' or nurses' bills for individual students.

All clothing for the laundry must be distinctly marked with indelible ink. Each student should provide herself with towels and a napkin ring.

GENERAL INFORMATION.

Tuition is free to all residents of Massachusetts. Non-residents of the State are required to pay at the beginning of each half-year session the sum of twenty-five dollars to the principal for the use of the school.

Text-books and reference books are loaned to the students free of charge.

Season tickets, at greatly reduced rates, can be obtained from any of the railroads entering Fitchburg.

State aid to a limited extent may be granted to students, after they have been in attendance for at least one term. Applications for this aid are to be made to the principal in writing, accompanied by a certificate from a person competent to testify, stating that the applicant needs the aid. Such aid is not furnished pupils whose homes are in Fitchburg, or to students from outside the State.

Parents and friends of pupils and all others who are interested in the work of the school are cordially invited to visit and inspect it.

For catalogues, specimen examination questions for admission, and such additional information as may be sought, address the principal at Fitchburg.
